

The 50 MHz DX Bulletin

Volume 6, Issue 7

July 1995

ISSN 1073-1024

The 50 MHz DX Bulletin was founded by Harry Schools KA3B. It is dedicated to the understanding and utilization of long distance propagation in the 6-meter Amateur band. The current editor and publisher is Victor Frank, K6FV. Subscription rates are \$20 U.S. third class mail, \$25 U.S./Canada/Mexico airmail, \$25 by surface and \$30 by airmail elsewhere for 12 issues. Circulation matters and DX reports should be sent to Victor R. Frank, K6FV, 12450 Skyline Blvd., Woodside, CA 94062-4541 USA. My Internet address is frank@sneezy.sri.com. The bulletin may be freely quoted, provided that credit is given.

What a Summer!

I have spent the past ten days entering and processing over 4000 reports of 50 MHz and above propagation, mostly for the months of June and July 1995. It has been a bumper year for six meter intercontinental QSOs.

I note North America-Africa six meter propagation on June 14, 17, 18, 26, 27 and July 6, 8, 9, and 10. I did not note any Cape Verde Is.-Northern American QSOs, however.

Six opened between North America and Europe on June 6, 14, 17, 18, 26 and July 2, 3, 5, 6, 7, 8, 10, 11, 15, 18, and 22, and that's not counting TV Video Carrier receptions. Furthermore, Europeans were worked as far west as W0, and as far north as VE8.

Across the Pacific, six meters opened between North America and the Far East on June 16 and July 2. VE7SKA confirmed reception of CBUT-2 in Vancouver, BC by one of the JAs he was talking to on six meters July 2, and reported reception of Chinese TV on 64.75 MHz and Malaysian TV on 48.25 MHz. He was unable to get a clear picture because of the different TV format (PAL), however.

The tropo path between the west coast of North America and Hawaii was open on two meters or higher on June 11, 20-23, 27-July 2, July 17, 18, and 20. The duct extended to Oregon, Washington, and even British Columbia (too weak there for ID) on June 30 and July 1.

Two meter (or higher frequency) Sporadic-E was observed in North America on June 6, 10, 17, 21, 28 and July 1, 5, 6, 7, 9, 18, and 19. Perhaps the highest frequency observed was TV channel 12 from Saskatchewan by two observers in Illinois.

Two meter Sporadic-E propagation was reported in Japan on May 23, June 4, 15, 24, July 1, 3, and 4. Notable are 144 MHz Es contacts with Russia, UA0FL, RA0FW, and RA0FY.

On six meters, Mongolia was activated with JT1KAA, JT1FAJ, and JT1FJA, presumably members of the same DXpedition. UA0CQ was also quite active on six meters.

Only one instance of transequatorial propagation from South America was reported, by XE1GE of CX1CCC on May 9. However, the path between Hawaii and the Cook Islands is still cooking, with Stuart reporting 20 days with TEP propagation during the month of July, which is not yet over.

Fieldhunter's List

50 MHz Standings as of June 30, 1995

In the list above, the columns are: Position on list; Call-sign; The stations own field; Number of fields worked; and Date last updated.

Readers are reminded that a grid field is a block of 10' latitude by 20' longitude, and is the first two letters of a grid square as determined by the Maidenhead Locator System. This 50 MHz list is from one (VHF) of four sponsored by the Swedish Sending Amateurs. The others are HF (part I and II), and UHF/SHF.

RULES:

1. All fields must have been worked via passive reflectors.
2. All stations involved must be on the earth's surface.
3. QSL cards are not required if you are certain that the other station considers the QSO to have been completed.
4. All QSOs must have been worked from points within a circle of 1000 km radius.
5. There is no starting date for contacts to be eligible.

June-July 1995 DX Reports

The following reports of 50 MHz and higher DX are courtesy of G4UPS, SM7AED's **Six-metre info**, JA1VOK's columns **World VHF News** in FIVE NINE and **VUHF DX Topics** in MOBIL HAM, JR3HED, ON4KST, TI2NA, WA5IYX, KO6ET, NOLL, WB8YFE, WB4DBB, VE7SKA, XE1AVM, and XE2HWW and postings on the Internet (many by N7DB, W3IWU, OX3LX, K0TLM & WB9AJZ/6). Reports by SM3EQY, SM7FJE, SM2HTM, SM4POB, are via **6-metre info**. Apologies to any sources I may have neglected.

The first entry is **mmddhhii**, where **mm** is the month, **dd** is the day of the month, **hh** is the hour UTC, and **ii** is the minutes after the hour. The year is understood to be 1995. A + to the right of the time indicates the observation was one of several in a time period and is probably later than reported. The grid square of the observing (and usually reporting) station may occur after a ">" symbol or to the right of his call at the far right. Symbols before his call are: V=Video Carrier, I=Inband video sidebands, F=FM audio, B=beacon, C=CW, S=SSB, W=worked by any mode, H=heard report.

Reports of Africa

CANARY IS: In response to a query by the European DX community about EH8ACW's inclusion of 5U = Niger in the list of countries worked on 50 MHz, I have the following reply: Debido a un error no he realizado la estación 5U, por lo que no es posible su confirmación.

Le agradezco el envío del 50 MHz bulletin. Después de la nueva licencia de EH que no ha habido nada nuevo y para mejor información le envío este disquete.

Podrías enviarme información de algún programa para PC que trabaje en formato de base de datos en *.DBF sobre VHF-UHF-HF del que admita los locators y si me puedes enviar dirección de sus distribuidores.

Como yo tengo tres indicativos: en EC8EC he trabajado en 10mts. muchas estaciones; en EA8ACW trabajo multibanda y EH8ACW para la estación especial de seis metros.

En fin, que perdone el retraso debido a mi trabajo, hemos tenido unas charlas de INTERNET que posiblemente estaré suscrito.

Atentamente, EH8ACW Leoncio Hernandez Rodriguez.

Due to an error which has taken place, I am unable to confirm the 5U station.

I appreciate your sending the 50 MHz bulletin. Nothing new has taken place since we obtained our new EH license (letter was written May 26), and so I am sending you {50 MHz log} information on this diskette.

Could you send me information of any database program for the PC which uses the *.DBF format for VHF-UHF-HF that allows tracking of grid locators and the address of the distributors?

I have three call signs: with EC8EC, I have worked on 10 mtrs many stations; with EA8ACW I work multiple bands; and with EH8ACW for the special station on six meters.

In conclusion, pardon the delay due to my work; I have been asking about subscribing to the Internet.

Sincerley, EH8ACW, Leoncio Hernandez Rodriguez

Leoncio sent me a 300K+ text file of his six meter logs starting with July 1992. They were formatted by some database program to four lines/entry. Listed are date, time, call, reports sent and received, frequency/10 (5011.000), mode (SSB), propagation (always F2), grid locator, and comments.

Since logging and database programs are of interest to our readers, I am inviting suggestions and submission of reviews of the same to be published in the coming months when the DX has died down.

I, myself, would use PC-File III (which is shareware) as a general database program. However, it does not keep track of countries and grid squares they way the more modern contest and logging programs made for the radio amateur do.
